

**Syngas Production and Conversion to Products -  
A Strategic Assessment of the Technologies,  
Markets and Competitive Landscape**

**Volume 2: Syngas Conversion to Products Assessment  
(completed April 2007)**

**A MULTI-CLIENT STUDY IN TWO VOLUMES**

**CONTENTS**

<b>SECTION I - EXECUTIVE SUMMARY</b> .....	<b>1</b>
A. CURRENT SITUATION AND INDUSTRY ISSUES.....	1
B. SYNGAS TO FUELS .....	3
1. MegaMethanol® .....	3
2. Methanol to Gasoline (MTG) and Methanol to Olefins (MTO) Plus Conversion of Olefins to Distillate (COD).....	5
3. Methanol to Propylene (MTP) .....	7
4. Syngas to Dimethyl Ether (DME).....	9
5. Gas-to-Liquids (GTL) via Fischer-Tropsch (F-T) .....	10
6. Coal-to-Liquids (CTL) via F-T .....	12
7. F-T Specialty Products (Waxes) .....	13
8. Syngas to Fuels – Overall .....	13
C. SYNGAS TO CHEMICALS .....	16
1. Ammonia.....	16
2. Hydrogen.....	17
3. Methanol.....	18
4. Oxo and Acetyl Chemicals.....	19
a) Oxo Chemicals .....	19
b) Acetyl Chemicals .....	20
5. Syngas to Chemicals - Overall .....	21

D. SYNGAS TO POWER.....	23
<b>SECTION II - INTRODUCTION/BACKGROUND.....</b>	<b>27</b>
A. INTRODUCTION.....	27
B. BACKGROUND.....	28
C. SCOPE AND METHODOLOGY.....	29
D. THE STUDY TEAM .....	30
E. GLOSSARY OF TERMS AND ABBREVIATIONS .....	33
<b>SECTION III - SYNGAS CONVERSION TO FUELS.....</b>	<b>37</b>
A. MEGAMETHANOL <sup>®</sup> .....	37
1. Definition .....	37
2. Historical Background.....	37
3. Methanol Market.....	38
4. Process Description and Technologies.....	38
a) Lurgi.....	39
b) Haldor-Topsøe.....	41
c) Other Process Developers .....	41
i. Syntroleum .....	41
ii. Starchem.....	41
iii. Johnson Matthey .....	42
iv. Others .....	42
5. Catalyst Suppliers.....	43
6. Economics .....	44
B. METHANOL TO GASOLINE (MTG) AND METHANOL TO OLEFINS (MTO) + CONVERSION OF OLEFINS TO DISTILLATE (COD).....	48
1. Historical Background.....	48
2. Gasoline and Diesel Market.....	49
3. MTO + Oligomerization to Fuels Process Descriptions .....	49
4. Catalyst Suppliers.....	52
5. Economics .....	53
C. METHANOL TO PROPYLENE (MTP <sup>®</sup> ).....	58
1. Historical Background.....	58
2. Ethylene and Propylene Market .....	59

3.	MTP <sup>®</sup> Process Description.....	60
4.	Catalyst Suppliers.....	61
5.	Economics .....	61
6.	Future Prospects of Olefins From Dimethyl Ether.....	65
D.	SYNGAS TO DIMETHYL ETHER (DME) .....	66
1.	Historical Background.....	66
2.	DME Process Description .....	67
3.	DME Catalyst Suppliers.....	69
4.	DME Economics .....	69
5.	Specific Technical/Scale-up Issues with 5000 TPD+ Methanol and DME Plants .....	72
E.	SYNGAS TO LIQUIDS USING FISCHER-TROPSCH (F-T) SYNTHESIS: GAS-TO-LIQUIDS (GTL).....	75
1.	Historical Background.....	76
2.	Process Description .....	77
3.	Catalyst Suppliers.....	80
4.	Economics .....	80
5.	Current Commercial Opportunities and Future Challenges.....	83
F.	SYNGAS TO LIQUIDS USING FISCHER-TROPSCH (F-T) SYNTHESIS: COAL-TO-LIQUIDS (CTL).....	84
1.	Historical Background.....	84
2.	Process Technologies .....	85
3.	Catalysts .....	85
4.	Economics .....	86
G.	SYNGAS TO FISCHER-TROPSCH (F-T) LIQUIDS WITH SPECIALTY PRODUCTS .....	87
H.	CATALYST MARKET SIZE AND GROWTH FOR GTL/CTL, MTO AND DME .....	89
1.	Catalyst Market Size and Growth for GTL/CTL .....	89
a)	GTL/CTL .....	89
b)	The Situation in China.....	93
c)	Catalyst Market Size and Growth for DME and MTO/MTP.....	96
2.	Competition in Catalyst Supply .....	97
I.	REFERENCES.....	99

<b>SECTION IV - SYNGAS CONVERSION TO CHEMICALS .....</b>	<b>105</b>
A. AMMONIA.....	105
1. Commercial Status .....	105
a) Global Market Situation.....	105
b) Major Technologies.....	107
c) Market Leaders.....	109
2. Emerging Technologies.....	110
3. Process Technology Licensing.....	111
4. Relative Economics of Syngas Conversion to Ammonia .....	113
a) Prototypical Economics.....	113
b) Sensitivity to Syngas Price Changes .....	114
5. Implications of Relative Costs .....	115
B. HYDROGEN .....	116
1. Commercial Status .....	116
a) Global Market Situation.....	116
b) Major Technologies.....	118
c) Market Leaders.....	118
2. Emerging Technologies.....	119
3. Process Technology Licensing.....	120
4. Relative Economics of Syngas Conversion to Hydrogen .....	121
a) Prototypical Economics.....	121
b) Sensitivity to Syngas Price Changes .....	122
5. Implications of Relative Costs .....	123
C. METHANOL .....	123
1. Commercial Status .....	124
a) Global Market Situation.....	124
b) Major Technologies.....	126
c) Market Leaders.....	127
2. Emerging Technologies.....	128
3. Process Technology Licensing.....	130
4. Relative Economics of Syngas Conversion to Methanol.....	131
a) Prototypical Economics.....	131

b)	Sensitivity to Syngas Price Changes .....	132
5.	Implications of Relative Costs .....	133
D.	OXO CHEMICALS .....	134
1.	n-Butanol.....	134
a)	Commercial Status .....	134
i.	Global Market Situation .....	134
ii.	Major Technologies.....	136
iii.	Market Leaders.....	136
b)	Emerging Technologies.....	136
c)	Process Technology Licensing.....	136
d)	Relative Economics of Syngas Conversion to n-Butanol .....	136
i.	Prototypical Economics.....	136
ii.	Sensitivity to Syngas Price Changes .....	138
e)	Implications of Relative Costs .....	138
2.	2-Ethyl hexanol .....	139
a)	Commercial Status .....	139
i.	Global Market Situation .....	139
ii.	Major Technologies.....	140
iii.	Market Leaders.....	140
b)	Emerging Technologies.....	140
c)	Process Technology Licensing.....	141
d)	Relative Economics of Syngas Conversion to 2-EH.....	141
i.	Prototypical Economics.....	141
ii.	Sensitivity to Syngas Price Changes .....	142
e)	Implications of Relative Costs .....	143
E.	ACETYLS .....	144
1.	Acetic Acid.....	144
a)	Commercial Status .....	144
i.	Global Market Situation .....	144
ii.	Major Technologies.....	145
iii.	Market Leaders.....	153
b)	Emerging Technologies.....	159
i.	Carbonylation.....	159

ii.	Ethane Oxidation – SABIC Process.....	160
iii.	Ethylene Oxidation – Showa Denko Process.....	161
c)	Process Technology Licensing.....	162
d)	Relative Economics of Syngas Conversion to Acetic Acid.....	164
i.	Prototypical Economics.....	164
ii.	Sensitivity to Syngas Price Changes .....	165
e)	Implications of Relative Costs .....	167
2.	Acetic Anhydride .....	167
a)	Commercial Status .....	167
i.	Global Market Situation.....	167
ii.	Major Technologies.....	169
iii.	Market Leaders.....	174
b)	Emerging Technologies.....	177
c)	Process Technology Licensing.....	178
d)	Relative Economics of Syngas Conversion to Acetic Anhydride.....	178
i.	Prototypical Economics.....	178
ii.	Sensitivity to Syngas Price Changes .....	180
e)	Implications of Relative Costs .....	181
F.	CATALYST MARKET SIZE AND GROWTH FOR SYNGAS- DERIVED CHEMICALS .....	181
1.	Catalysts for Chemicals.....	182
a)	Ammonia and Methanol.....	182
b)	Hydrogen.....	183
c)	Oxochemicals and Acetyls.....	184
2.	Competition in Catalyst Supply .....	185
G.	REFERENCES.....	187
<b>SECTION V - SYNGAS CONVERSION TO POWER .....</b>		<b>191</b>
A.	COMMERCIAL STATUS.....	191
1.	Projected Electric Supply Growth in the U.S. & Worldwide.....	191
2.	Role of Coal in Power Generation .....	191
3.	Tracking New Coal-Fired Plants (Coal’s Resurgence in Power Generation) .....	192

B.	CHALLENGES IN ELECTRIC SUPPLY GROWTH.....	194
1.	Air Pollution – and Other Environmental Issues .....	194
2.	Electric Supply Security.....	194
3.	CO <sub>2</sub> Emissions and the Global Climate Change Issue.....	195
C.	ROLE OF IGCC TECHNOLOGY IN RESOLVING CRITICAL ISSUES.....	196
1.	Technical and Environmental Issues.....	196
2.	Investment and Economic Issues .....	198
3.	Commercial Issues .....	199
D.	BARRIERS TO IGCC TECHNOLOGY IMPLEMENTATION .....	203
1.	Misperceptions of Gasification .....	203
2.	Regulatory Uncertainty .....	203
3.	NO <sub>x</sub> Emissions .....	203
4.	Capital Cost.....	204
5.	Technology Risk .....	204
6.	Integration .....	204
E.	REFERENCES.....	204
<b>SECTION VI - RECOMMENDATIONS AND CONCLUSIONS .....</b>		<b>207</b>
A.	INDUSTRY ISSUES .....	207
B.	FUELS.....	209
1.	MegaMethanol <sup>®</sup> .....	209
2.	MTO and Oligomerization to Fuels .....	211
3.	Fischer-Tropsch (F-T) Conversion to Fuels.....	212
4.	Dimethyl Ether (DME).....	214
5.	Syngas to Fuels – Overall .....	216
C.	CHEMICALS.....	218
1.	Ammonia.....	219
2.	Hydrogen.....	220
3.	Methanol.....	221
4.	DME.....	222
5.	Oxo Chemicals .....	223
6.	Acetyls.....	224
7.	Syngas to Chemicals - Overall .....	226

D.	POWER.....	228
1.	Market Needs / Drivers .....	229
2.	Technology Needs.....	229
	a) Process and Feeds.....	229
	b) Refractory Liners.....	230
	c) Fundamental Studies .....	230
3.	Syngas to Power - Overall.....	232
