Syngas Production and Conversion to Products – A Strategic Assessment of the Technologies, Markets and Competitive Landscape

TCGR's two-volume study entitled ***Syngas Production and Conversion to Products – A Strategic Assessment of the Technologies, Markets and Competitive Landscape*** has been formally launched. Charter subscribers are currently shaping the final Table of Contents and finalizing the study scope.

The study development and production time constitute approximately four months, resulting in delivery dates in November for Volume 1 (Syngas Production) and December for Volume 2 (Syngas Conversion).

In the timely and comprehensive two-part study, ***“Syngas Production and Conversion to Products – A Strategic Assessment of the Technologies, Markets and Competitive Landscape,”*** The Catalyst Group Resources (TCGR) will provide a uniquely integrated value-chain assessment, from feedstock to enduses, in the syngas production and conversion train. TCGR's study will provide a detailed business analysis and R&D pipeline examination that can be used to determine the shifts/changes required to pinpoint future investment decisions.

The study proposal and proposed Tables of Contents for the two-volume report series can be found at <http://www.catalystbrp.com/SyngasProduction.html>. .

For more information, contact Jeanne Drahos (jmd@catalystgrp.com) or John J. Murphy (jjm@catalystgrp.com) at 215-628-4447.

The Catalyst Group Resources (TCGR), a member of The Catalyst Group, is dedicated to monitoring and analyzing technical and commercial developments in catalysis as they apply to the global refining, petrochemical, fine/specialty chemical, pharmaceutical, polymer/elastomer and environmental industries.
