

ANALYSIS OF DEMAND FOR CAPTURED CO₂ AND PRODUCTS FROM CO₂ CONVERSION

A techno-economic investigation
commissioned by the members of the
Carbon Dioxide Capture & Conversion (CO₂CC) Program

Client Private
November 2012

The Carbon Dioxide Capture & Conversion (CO₂CC) Program

The **CO₂CC Program** is a membership-directed consortium whose members are involved in the development, monitoring and utilization of the “state-of-the-art” in technological progress and commercial implementation of carbon dioxide capture/clean-up and conversion. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to document technically and commercially viable options for CO₂ capture/clean-up as well as its conversion into useful products which meaningfully address the challenges posed by CO₂ life-cycle and overall sustainability issues.

Members receive three in-depth **CO₂CC Techno-economic Reports** which are written by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CO₂CC Communiqués* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the CO₂CC Program **Annual Meeting**.

The **Carbon Dioxide Capture & Conversion (CO₂CC) Program** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact John J. Murphy at John.J.Murphy@catalystgrp.com or +1.215.628.4447 (x1121).

CONTENTS

EXECUTIVE SUMMARY	xix
1. INTRODUCTION	1
1.1 SCOPE AND OBJECTIVE OF THE REPORT	1
1.2 ORGANIZATION OF THE REPORT	1
1.3 SOURCES AND QUALITY OF CO ₂	2
1.4 CAPTURE TECHNOLOGIES	3
1.5 CAPTURE FROM THE ATMOSPHERE	4
1.6 REPORT CONTRIBUTORS	5
1.7 REFERENCES	6
2. CAPTURED/CONVERTED CO₂: DEMAND IN CHEMICAL USES.....	7
2.1 SHORT TERM OPTIONS AND MARKET DEMAND/GROWTH	7
2.1.1 Urea	7
2.1.2 Organic Carbonates	10
2.1.2.1 Acyclic carbonates	10
2.1.2.2 Cyclic carbonates	13
2.1.3 Polycarbonates.....	14
2.1.4 Organic carbamates	17
2.1.5 Polyurethanes	18
2.1.6 Formic acid.....	18
2.1.7 Methanol.....	20
2.1.7.1 Methanol derived chemicals.....	21
2.1.8 Specialty chemicals via electrochemical syntheses.....	22
2.1.9 Acrylates and polyacrylates.....	23
2.1.10 Inorganic carbonates.....	24
2.1.11 Production of chemicals from algae (micro- and macro-algae)	25
2.1.11.1 Pigments	29
2.1.11.2 Polyunsaturated fatty acids.....	29
2.1.11.3 Proteins	29
2.1.11.4 New materials.....	30

2.1.12	Assessment and implications	30
2.2	MEDIUM TERM OPTIONS AND MARKET DEMAND/GROWTH	34
2.2.1	Methanol from non-fossil hydrogen	35
2.2.2	Methanol derived chemicals (e.g. acetic acid).....	37
2.2.3	Olefins.....	38
2.2.4	Carboxylates via C-H activation.....	39
2.2.4.1	Fatty acids derivatives	40
2.2.5	Hybrid technologies for chemicals	40
2.2.6	Photochemical syntheses	42
2.2.7	Photochemical and photoelectrochemical reduction of CO ₂ in water	45
2.2.7.1	Olefins.....	46
2.2.7.2	Alcohols.....	47
2.2.7.3	Aldehydes	47
2.2.8	Assessment and implications	47
2.3	LONG TERM OPTIONS AND MARKET DEMAND/GROWTH	48
2.3.1	Photochemical synthesis mimicking photosynthesis.....	49
2.3.2	Assessment and implications	49
2.4	REFERENCES	49
3.	CAPTURED/CONVERTED CO₂: DEMAND IN ENERGY PRODUCTS	57
3.1	SHORT TERM OPTIONS AND MARKET DEMAND/GROWTH	57
3.1.1	Methanol (fuel) from fossil hydrogen.....	58
3.1.2	Methanol (fuel) from non-fossil hydrogen	58
3.1.2.1	Use of excess electric energy for water electrolysis	59
3.1.2.2	The direct electro-reduction of CO ₂ in water	60
3.1.2.3	Use of PV for water electrolysis	62
3.1.2.4	Use of wind power for water electrolysis	63
3.1.2.5	Thermodynamic cycles	64
3.1.2.6	Use of CSPs.....	65
3.1.3	Methanol derived fuels	65
3.1.3.1	DME	65
3.1.3.2	Dimethylcarbonate	65
3.1.3.3	Other fuels and chemicals	66
3.1.4	Dry reforming of methane	66
3.1.5	Integration of CO ₂ use into FT-plants	67

3.1.6	Assessment and implications.....	67
3.2	MEDIUM TERM OPTIONS AND MARKET DEMAND/GROWTH.....	67
3.2.1	Hydrocarbons	68
3.2.2	Alcohols.....	68
3.2.3	Energy from aquatic biomass	68
3.2.4	Assessment and implications.....	73
3.3	LONG TERM OPTIONS AND MARKET DEMAND/GROWTH	73
3.3.1	Man-made photosynthesis	74
3.3.2	Assessment and implications.....	74
3.4	REFERENCES	75
4.	CAPTURED CO₂: DEMAND IN UNCONVERTED (NON SYNTHETIC) USES	79
4.1	SHORT TERM OPTIONS AND MARKET DEMAND/GROWTH	79
4.1.1	Enhanced Oil Recovery (EOR)	79
4.1.2	Others	83
4.2	MEDIUM AND LONG TERM OPTIONS AND MARKET DEMAND/ GROWTH....	84
4.2.1	Air conditioning fluid	84
4.2.2	Others	86
4.3	ASSESSMENT AND IMPLICATIONS.....	86
4.4	REFERENCES	87
5.	INDEX	89

FIGURES

Figure ES-1	Potential CO ₂ markets, by CO ₂ source, CO ₂ -based product, and technology route.....	xx
Figure 1.2.1	Time-scale, energy sources, technologies for CO ₂ conversion and products ..	2
Figure 2.1.1.1	Capacity of soil in using nitrogen.....	9
Figure 2.1.1.2	Global area capacity (Mt/y) outlook for urea to 2016. Largest plant 1 Mt/y or 3,500 t/d.	9
Figure 2.1.1.3	Global area demand (Mt/y) outlook for urea to 2016.	10
Figure 2.1.2.1	Uses of alkyl carbonates	11
Figure 2.1.3.1	Annual growth in global consumption of polycarbonates (kt/y).....	15
Figure 2.1.6.1	World consumption of formic acid in 2009	19

Figure 4.1.1.2	U.S. and Global CO ₂ -EOR Oil Production Projects	80

TABLES

Table ES-1	Markets for Compounds that are or Can be Derived from CO ₂ in Short- medium Term (to 2020) (amounts in Mt/y).....	xxi
Table 1.3.1	Industrial sources of CO ₂ (not including power plants)	3
Table 2.1.1.1	Worldwide use of urea and CO ₂ in the short term.....	8
Table 2.1.2.1	The annual production capacity of DMC in China in 2008.....	13
Table 2.1.11.1	Useful substances contained in algal biomass	29
Table 2.1.12.1	Markets of compounds that are or can be derived from CO ₂ in short-medium term (amounts in Mt/y)	31
Table 2.2.1.1	Types of electrolyzers	35
Table 2.2.1.2	Comparisons of the performance of some commercial electrolyzers	36
Table 2.2.1.3	Comparison of the production of methanol from three different routes.....	37
Table 2.2.3.1	Methanol to olefins in China in the short term	38
Table 2.2.7.1	Comparison of two approaches for solar energy storage into chemicals obtained from CO ₂ reduction.....	46
Table 2.2.8.1	Demand for CO ₂ in products derived from it in the short-medium term (to 2030) (Mt/y)	48
Table 3.1.2.1	Cost of H ₂ (US\$/GJ) projected at 2020-2030 as a function of the technology used for its production	58
Table 3.1.2.2	Electrodes and products of reduction of CO ₂ in water	60
Table 3.1.2.3	Multi-electron vs one-electron reduction of CO ₂	61
Table 3.1.2.4	Rate of growth of the power of installed PV	62
Table 3.1.2.5	Sulphur-iodine cycle	64

Table 3.2.3.1	Companies currently engaged in macroalgae to fuels production	69
Table 3.2.3.2	Reaction conditions and conversion of soybean oil using homogeneous catalysts	70
Table 3.2.3.3	Various catalytic systems used in transesterification reactions	71
Table 3.2.3.4	Fuel characteristics of different bio-oils	72
Table 3.2.3.5	Starch content of some micro-algae.....	73
Table 4.1.2.1	Some examples of technological applications of CO ₂	83
Table 4.2.1.1	Chemical properties of different refrigerants, including CO ₂	85

SCHEMES

Scheme 2.1.1.1	Synthesis of urea from CO ₂	7
Scheme 2.1.1.2	Schematic representation of urea synthesis	7
Scheme 2.1.2.1	Synthesis of ethylene carbonate	11
Scheme 2.1.7.1	Uses of methanol	20
Scheme 2.1.8.1	Electrocarboxylation of organic substrates for the production of fine-chemicals	23
Scheme 2.2.5.1	CO ₂ reduction to methanol in water promoted by F _{ate} DH, F _{ald} DH and ADH.....	40
Scheme 2.2.5.2	CO ₂ conversion into CH ₃ OH by ZnS-A photocatalysis	40
Scheme 2.2.5.3	Active site structures of (a) CODH _{Ni} and (b) CODH _{Mo}	41
Scheme 2.2.5.4	The Photoreduction of CO ₂ to CO by CODH _{Ni} modified NPs	41
Scheme 2.2.6.1	Photochemical reduction of CO ₂ in the BNAH solution.....	42
Scheme 2.2.6.2	Proposed mechanism for CO ₂ photoreduction by Ru complex.....	43
Scheme 2.2.6.3	Proposed photoreduction of CO ₂ with H ₂	43
Scheme 2.2.6.4	Photochemical CO ₂ splitting	44
Scheme 2.2.7.1	The selective conversion of CO ₂ to methanol at a p-GaP	47
Scheme 3.1.2.1	Proposed mechanism for the pyridinium- catalyzed reduction of CO ₂ to methanol	62
Scheme 3.1.3.1	Fuels and Products made from CO ₂ . In red, products made in the medium-, long-term	66
Scheme 3.2.3.1	Conversion of lipids (tryglicerides) into FAMES (biodiesel).....	69
