

## **ADVANCES IN ON-PURPOSE TECHNOLOGY FOR MONO- AND DI-OLEFINS**

A technical investigation  
commissioned by the members of the  
Catalytic Advances Program

Client Private  
October 2016

### The Catalytic Advances Program (CAP)

The **Catalytic Advances Program (CAP)** is an information resource for research and development organizations in the petroleum, chemical, and polymer industries. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to provide a technical update on commercially viable advances in catalysis as well as benchmark commercial advances in catalysis and process technology.

Members receive three in-depth **CAP Technical Reports** which are written and peer reviewed by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CAP Communications* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the **CAP Annual Meeting**.

The **Catalytic Advances Program (CAP)** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact Matthew A. Colquitt at [Matthew.A.Colquitt@catalystgrp.com](mailto:Matthew.A.Colquitt@catalystgrp.com) or +1.215.628.4447 (x1130).

## CONTENTS

<b>EXECUTIVE SUMMARY</b> .....	<b>xvii</b>
<b>1. INTRODUCTION</b> .....	<b>1</b>
1.1 REPORT OVERVIEW .....	7
1.2 AUTHORS & CONTRIBUTORS .....	7
1.3 REFERENCES .....	9
<b>2. ADVANCES IN DEHYDROGENATION AND OXIDATIVE DEHYDROGENATION TECHNOLOGY FOR MONO- AND DI-OLEFIN PRODUCTION</b> .....	<b>11</b>
2.1 INTRODUCTION.....	11
2.2 ADVANCES IN CATALYST AND TECHNOLOGY FOR COMMERCIAL APPLICATIONS.....	13
2.2.1 On-Purpose Propylene.....	13
2.2.2 On-Purpose Butadiene.....	22
2.2.3 On-Purpose Butene.....	26
2.3 CURRENT R&D AND FUTURE DEVELOPMENT .....	27
2.3.1 Catalysts .....	27
2.3.2 Processes .....	33
2.3.3 Patent activity .....	39
2.4 CONCLUSIONS, RECOMMENDATIONS & HURDLES.....	43
2.5 REFERENCES .....	45
<b>3. ADVANCES IN METATHESIS TECHNOLOGY FOR MONO- AND DI-OLEFIN PRODUCTION</b> .....	<b>57</b>
3.1 INTRODUCTION.....	57
3.2 ADVANCES IN CATALYST AND TECHNOLOGY FOR COMMERCIAL APPLICATIONS.....	60
3.2.1 CB&I Lummus- Olefin Conversion Technology (OCT®) for on-Purpose Propylene	60
3.2.2 Mitsui chemicals.....	64
3.2.3 Naphtha steam crackers with integrated metathesis unit.....	64
3.3 CURRENT R&D AND FUTURE DEVELOPMENT .....	64
3.3.1 Catalysts .....	64
3.3.2 Processes .....	74
3.3.3 Patent activity .....	77
3.4 CONCLUSIONS, RECOMMENDATIONS & HURDLES.....	81
3.5 REFERENCES .....	82
<b>4. ADVANCES IN BIO-BASED TECHNOLOGY FOR MONO- AND DI-OLEFIN PRODUCTION</b> .....	<b>87</b>
4.1 INTRODUCTION.....	87

4.2	ADVANCES IN CATALYST AND TECHNOLOGY FOR COMMERCIAL APPLICATIONS .....	87
4.2.1	On-Purpose Ethylene .....	87
4.2.2	On-Purpose Propylene .....	95
4.2.3	On-Purpose Butadiene .....	97
4.2.4	On-Purpose Isoprene.....	100
4.3	CURRENT R&D AND FUTURE DEVELOPMENT .....	102
4.3.1	Catalysts.....	102
4.3.2	Processes .....	110
4.3.3	Patent Activity .....	113
4.4	CONCLUSIONS, RECOMMENDATIONS & HURDLES .....	117
4.5	REFERENCES .....	118
<b>5.</b>	<b>INDEX.....</b>	<b>127</b>

## FIGURES

Figure 1	Concept for fluid-bed oxidative dehydrogenation of ethane .....	vii
Figure 1.1	Light olefins share in global demand for petrochemicals in 2013 (produced from data in Kerkhofs, 2014).....	1
Figure 1.2	Main uses of light mono- and di-olefins (data from Bender, 2014; Geilen et al., 2013; Plotkin, 2015; True, 2010).....	2
Figure 1.3	Global volumes of ethylene, propylene, isobutylene, 1-butene, 2-butene and butadiene by process type (reproduced from Bender, 2014).....	3
Figure 1.4	Feedstock for steam crackers in 2005, 2010 and 2015 .....	4
Figure 1.5	Share of propylene production technologies in 2005 and projections for 2030 (Wood Mackenzie, 2014).....	6
Figure 2.1	Overview of propane dehydrogenation installations in operation and in construction/planned (Sattler et al., 2014b) .....	14
Figure 2.2	Catofin <sup>TM</sup> propane dehydrogenation process flow diagram (Panditrao, 2014) .....	15
Figure 2.3	Oleflex <sup>TM</sup> propane dehydrogenation process flow diagram (Vora, 2012).....	19
Figure 2.4	STAR <sup>TM</sup> propane dehydrogenation process flow diagram (Uhde, 2016).....	20
Figure 2.5	FBR Snamprogetti propane dehydrogenation process flow diagram (Sattler et al., 2014b).....	21
Figure 2.6	Linde-BASF propane dehydrogenation process (Herauville, 2012).....	22
Figure 2.7	Ethylene, propylene and butadiene prices in Asia (Panditrao, 2014) .....	23
Figure 2.8	Catadiene <sup>TM</sup> butane dehydrogenation process (Chauvel and Lefebvre, 1989).....	24
Figure 2.9	Oxo-D <sup>TM</sup> n-butenes oxidative dehydrogenation process (Chauvel and Lefebvre, 1989).....	25
Figure 3.1	Most common homogeneous catalyst families for metathesis reactions .....	58
Figure 3.2	Mechanism of cross metathesis according to (Herisson and Chauvin, 1970) .....	59
Figure 3.3	(a) Distribution of the OCT plants worldwide; (b) Capacity of the plants .....	61

Figure 3.4	Simplified process diagram of the OCT metathesis unit for propylene production.....	61
Figure 3.5	(a) Simplified block diagram of the integration with naphtha cracker; (b) Distribution of propylene to ethylene ratio and relative total additional cost in the integrated design .....	63
Figure 3.6	The catalytic cycle for the conversion of 1-butene to propylene with the [W] (=O)H <sub>3</sub> /Alumina precursor (Pelletier and Basset, 2016) .....	67
Figure 3.7	Proposed WO <sub>3</sub> /SiO <sub>2</sub> active site (Conley et al 2014) .....	69
Figure 4.1	Process flow diagram of a bioethanol-based ethylene plant (Zhang and Yu, 2013)....	88
Figure 4.2	Process flow diagram of the Scientific Design process (SABIC - Clariant Partnership Company, 2014).....	91
Figure 4.3	Process flow diagram of the Atol™ process (Mallet, 2015).....	92
Figure 4.4	Process flow diagram of the Chematur process (Chematur Engineering, 2016) .....	94
Figure 4.5	Reactions for one-step and two-step butadiene production from ethanol .....	97
Figure 4.6	Simplified process flow diagram of LanzaTech's butadiene production process (LanzaTech, 2014) .....	100
Figure 4.7	Continuous cascade fermentation system for producing ethanol from waste sugars (Dale, 2005) .....	111

## TABLES

Table 1.1	Product yields from steam cracking of various feeds (Roushan, 2016).....	5
Table 1.2	Impact of shale gas on North America downstream chemical value chains (Eramo, 2014).....	5
Table 1.3	Top 10 ethylene complexes (Brelsford, 2014) .....	6
Table 2.1	Industrially known dehydrogenation technologies (Nawaz, 2015).....	13
Table 2.2	Chromia/alumina industrial catalyst specifications (Nawaz, 2015).....	15
Table 2.3	Properties of CATOFIN catalyst samples taken from the same commercial plant (Oviol et al., 2012) .....	17
Table 3.1	Overview of Olefin Metathesis Reactions.....	58
Table 3.2	Process features and benefits of the OCT Technology .....	62
Table 3.3	The influence of various functional groups on the catalyst stability.....	65
Table 4.1	Overview of current and planned plants for ethylene production from bioethanol (IRENA/IEA-ETSAP, 2013).....	89
Table 4.2	Performance of promising catalysts for ethanol dehydration (Gallo et al., 2014) ....	105
Table 4.3	Performance of promising catalysts for ethanol-to-butadiene conversion (Gallo et al., 2014).....	107
Table 4.4	Selected catalysts for the dehydration of butanediols to butadiene (Makshina et al., 2014).....	109
