The Catalytic Advances Program (CAP)

The Catalytic Advances Program (CAP) is an information resource for research and development organizations in the petroleum, chemical, and polymer industries. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to provide a technical update on commercially viable advances in catalysis as well as benchmark commercial advances in catalysis and process technology.

Members receive three in-depth **CAP Technical Reports** which are written and peer reviewed by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CAP Communications* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the **CAP Annual Meeting**.

The **Catalytic Advances Program (CAP)** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact Matthew A. Colquitt at Matthew.A.Colquitt@catalystgrp.com or +1.215.628.4447 (x1130).

CONTENTS

EXECUTIVE SUMMARY ..... **xi**

1. INTRODUCTION **1**

2. ADVANCES IN OLEFIN CO-MONOMER PRODUCTION **3**

2.1 INTRODUCTION 3

2.1.1 The Global Alpha Olefins Market 3

2.1.2 Sources and Applications Review 4

2.1.3 Criteria for Co-monomer Selection 6

2.2 ADVANCES IN CATALYSTS AND TECHNOLOGY FOR COMMERCIAL APPLICATIONS 9

2.2.1 Full Range Linear Alpha Olefins Processes 9

2.2.2 Extractive Sources 17

2.2.3 On-Purpose 1-Butene Processes 20

2.2.4 On-Purpose 1-Hexene Processes 22

2.2.5 On-Purpose 1-Octene Processes 24

2.3 CURRENT R&D AND FUTURE DEVELOPMENT - NEW CATALYSTS AND PROCESSES UNDER DEVELOPMENT 28

2.3.1 Catalyst Development Activity 28

2.3.2. Process Developments 43

2.4 CONCLUSIONS, RECOMMENDATIONS & HURDLES 44

2.4.1 Changing Supply Structures 44

2.4.2 Full-Range Alpha Olefin Technologies 45

2.4.3 Highly Selective On-Purpose Technologies 46

2.4.4 Recommendations & Hurdles – Alpha Olefin Technologies 47

2.5 REFERENCES 48

3. ADVANCES IN POLYOLEFIN PRODUCTION **51**

3.1 INTRODUCTION 51

3.1.1 Global Capacity for Production of Polyethylene 51

3.1.2 Global Capacity for Production of Polypropylene 52

3.1.3 Global Demand for Polyolefins 53

3.2 EVOLUTION & CURRENT STATUS OF POLYOLEFIN TECHNOLOGIES 54

3.2.1 Review of Industry Evolution & Trends 54

3.2.2 Polyethylene Catalyst & Process Technologies 61

3.2.3 Polypropylene Catalyst & Process Technologies 70
3.3 CURRENT R&D AND FUTURE DEVELOPMENT - NEW CATALYSTS AND PROCESSES UNDER DEVELOPMENT 76
3.3.1 Polyethylene Technologies 76
3.3.2 Polypropylene Technologies 116
3.4 SUMMARY & CONCLUSIONS 132
3.4.1 Research into New Processes for PE & PP 132
3.4.2 Research into PE Catalyst & Product Technologies 133
3.4.3 Research into PP Catalyst & Product Technologies 134
3.5 REFERENCES 135
4. INDEX 139
