

ADVANCES IN MINERAL CARBONATION OF CO₂

A techno-economic investigation
commissioned by the members of the
Carbon Dioxide Capture & Conversion (CO₂CC) Program

Client Private
July 2018

The Carbon Dioxide Capture & Conversion (CO₂CC) Program

The **CO₂CC Program** is a membership-directed consortium whose members are involved in the development, monitoring and utilization of the “state-of-the-art” in technological progress and commercial implementation of carbon dioxide capture/clean-up and conversion. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to document technically and commercially viable options for CO₂ capture/clean-up as well as its conversion into useful products which meaningfully address the challenges posed by CO₂ life-cycle and overall sustainability issues.

Members receive three in-depth **CO₂CC Techno-economic Reports** which are written by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CO₂CC Communiqués* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the CO₂CC Program **Annual Meeting**.

The **Carbon Dioxide Capture & Conversion (CO₂CC) Program** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact John J. Murphy at John.J.Murphy@catalystgrp.com or +1.215.628.4447 (x1121).

CONTENTS

EXECUTIVE SUMMARY	xvii
1. INTRODUCTION	1
1.1 REPORT CONTRIBUTORS.....	2
2. MINERAL CARBONATION BASICS	3
2.1 DEFINING ALKALINITY	3
2.2 REACTION KINETICS AND TIMESCALE	6
2.2.1 Dissolution/Leaching Kinetics	6
2.2.1.1 Carbon Dioxide Dissolution.....	6
2.2.1.2 Mineral Dissolution Kinetics	9
2.2.1.3 Industrial Byproducts and Waste Materials	13
2.2.2 Carbonation Kinetics.....	16
2.2.2.1 Natural Weathering	19
2.2.2.2 Olivine.....	19
2.2.2.3 Serpentine.....	20
2.2.2.4 Wollastonite	21
2.2.2.5 Seawater	21
2.2.2.6 Industrial Byproducts and Waste Materials	22
2.3 THERMODYNAMICS	28
2.4 REFERENCES.....	34
3. ALKALINITY SOURCES	37
3.1 NATURAL, ULTRAMAFIC MINERALS	37
3.2 INDUSTRIAL BYPRODUCTS	37
3.3 MAGNITUDE AND SCALE OF SOURCES	37
3.3.1 Magnitude of Natural Mineral Alkalinity Sources.....	38
3.3.2 Magnitude of Industrial Alkalinity Sources	39
3.4 ENERGY REQUIREMENTS AND COSTS OF RETRIEVING ALKALINITY	43
3.4.1 Introduction	43
3.4.2 Alkalinity Sources	43
3.4.2.1 Mining.....	43
3.4.2.2 Industrial Byproducts	45
3.4.3 Overall Processing Energy Requirements and Costs	46

3.4.3.1	Ways to Increase Efficiency of Processing.....	46
3.4.4	Carbonation Processes	47
3.4.4.1	Direct Carbonation.....	47
3.4.4.2	Indirect Carbonation	49
3.5	REFERENCES	51
4.	EX SITU MINERAL CARBONATION.....	53
4.1	REACTIONS WITH PRESSURIZED CO ₂	53
4.1.1	Direct vs Indirect Carbonation.....	53
4.1.2	Aqueous vs Solid Reactions.....	55
4.1.3	Example Processes.....	57
4.1.3.1	Serpentine	58
4.1.3.2	Olivine.....	59
4.1.3.3	Wollastonite	59
4.1.3.4	Waste Cement	62
4.1.4	Key Points.....	63
4.2	LIFE-CYCLE ASSESSMENT OF CARBONATION WITH EXHAUST STREAMS	63
4.3	IMPACT OF ADDING ALKALINITY TO LAND.....	65
4.4	IMPACT OF ADDING ALKALINITY TO THE OCEANS	66
4.4.1	Carbon Cycle in Ocean	66
4.4.1.1	Revelle Factor	67
4.4.2	Impact on Marine Ecosystems	68
4.4.3	Impact on Regulations	69
4.4.4	Potential for CCS	69
4.5	OTHER CONSIDERATIONS FOR ADDING ALKALINITY TO LAND AND OCEANS.....	71
4.5.1	Social Considerations.....	71
4.5.2	Ethical Considerations	72
4.6	REFERENCES	72
5.	IN SITU MINERAL CARBONATION.....	75
5.1	AMBIENT AIR	75
5.1.1	Mine Case Studies.....	75
5.1.1.1	Diavik Mine	75

5.1.1.2 Thetford Mines.....	76
5.1.1.3 De Beers.....	77
5.1.2 Overall Requirements for in situ Carbonation of Tailings.....	78
5.1.3 Other Potential Mine Waste Feedstocks.....	79
5.1.3.1 Nickel Tailings.....	79
5.1.3.2 Asbestos Tailings.....	80
5.1.3.3 Paper Mill Waste.....	80
5.1.3.4 Red mud.....	80
5.1.4 Challenges.....	80
5.2 SUBSURFACE.....	81
5.2.1 Peridotite.....	81
5.2.2 Basalt.....	83
5.2.3 CarbFix.....	84
5.2.4 Challenges.....	86
5.3 REFERENCES.....	87
6. MINERAL CARBONATION DEVELOPMENTS OVER TIME.....	91
6.1 HISTORICAL.....	91
6.2 FUTURE WORK.....	94
6.2.1 Kinetics.....	94
6.2.2 Further Optimization.....	94
6.2.3 Expansion.....	95
6.2.4 Non-engineering.....	96
6.3 REFERENCES.....	97
7. INDEX.....	98
