

ADVANCES IN ELECTROCATALYSIS AND PHOTOCATALYSIS FOR CHEMICALS PRODUCTION

A technical investigation
commissioned by the members of the
Catalytic Advances Program

Client Private
September 2019

The Catalytic Advances Program (CAP)

The Catalytic Advances Program (CAP) is an information resource for research and development organizations in the petroleum, chemical, and polymer industries. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to provide a technical update on commercially viable advances in catalysis as well as benchmark commercial advances in catalysis and process technology.

Members receive three in-depth **CAP Technical Reports** which are written and peer reviewed by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CAP Communications* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the **CAP Annual Meeting**.

The **Catalytic Advances Program (CAP)** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact John J. Murphy at John.J.Murphy@catalystgrp.com or +1.215.628.4447 (x1121).

CONTENTS

EXECUTIVE SUMMARY	xv
1. INTRODUCTION	1
1.1 GREEN CHEMISTRY AND CHALLENGES: STATE OF THE ART	1
1.2 AUTHORS & CONTRIBUTORS	3
1.3 REFERENCES	4
2. ELECTROCATALYSIS FOR CHEMICALS PRODUCTION	7
2.1 INTRODUCTION.....	7
2.1.1 Scope	7
2.1.2 Electrochemical Systems.....	9
2.1.3 Overpotential & Faradaic Efficiency & Molar Selectivity	11
2.1.4 Electrode Materials.....	13
2.1.4.1 Metal Electrodes.....	13
2.1.4.2 Carbon Based Electrodes.....	14
2.1.4.3 Gas Diffusion Electrodes.....	14
2.1.4.4 Sacrificial Anodes	16
2.1.4.5 Electrochemical Surface Area Determination of Electrodes.....	16
2.1.5 Membranes	17
2.1.5.1 Cation Exchange Membranes.....	18
2.1.5.2 Ion Exchange Membranes as Solid Electrolytes	18
2.1.5.3 Ion Exchange Membranes in Microbial Electrosynthesis.....	19
2.1.5.4 Anion Exchange Membranes	19
2.1.6 Redox-innocent or Redox-active Electrocatalyst Mediators.....	20
2.1.7 Bioelectrocatalysis.....	22
2.1.8 Solvents and Electrolytes	23
2.2 INORGANIC ELECTROSYNTHESIS	24
2.2.1 Electrochemical Oxidation Reactions	24
2.2.1.1 Chlorine Evolution Reaction.....	26
2.2.1.2 Chlorate Electrosynthesis	29
2.2.2 Electrochemical Reduction Reactions.....	29
2.2.2.1 Electroreduction of N ₂ to NH ₃	30
2.2.2.2 Electroreduction of O ₂ to H ₂ O ₂	34
2.2.2.3 Electrocatalytic Reduction of CO ₂	37
2.3 ORGANIC ELECTROSYNTHESES	40

2.3.1	Anodic Functionalization of Organic Compounds.....	44
2.3.1.1	C–H Activation - Electrohalogenation.....	44
2.3.1.2	C–H Activation - Methane Oxidation.....	45
2.3.1.3	C–H Activation - Coupling Reactions	47
2.3.1.4	C–H Activation - Cyclization.....	50
2.3.2	Cathodic Conversion of Organic Compounds.....	51
2.3.2.1	Dehalogenation.....	51
2.3.2.2	Carboxylation & CO ₂ Reduction.....	51
2.3.2.3	Coupling Reactions	55
2.3.2.4	Cyclization.....	59
2.3.2.5	Electrocatalytic Hydrogenation.....	59
2.4	ELECTROCHEMICAL REACTORS	62
2.4.1	Technical Upscaling Issues	64
2.4.2	Integration of Electrochemical Reactors	65
2.4.3	Synergies with other Chemical Processes	65
2.5	CONCLUSIONS, RECOMMENDATIONS & FUTURE PERSPECTIVES	66
2.6	REFERENCES.....	68
3.	PHOTOCATALYSIS FOR CHEMICALS PRODUCTION	79
3.1	INTRODUCTION.....	79
3.1.1	Mechanisms of Heterogeneous Photocatalysis	79
3.1.2	Physico-chemical Characterization of the Photocatalysts.....	83
3.1.2.1	Bulk and Surface Characterization.....	83
3.1.2.2	Optical and Electronic Characterization.....	85
3.1.3	Immobilized and Dispersed Photocatalysts.....	87
3.1.4	Solvents	88
3.1.5	Irradiation Systems.....	89
3.1.6	Factors Influencing the Selectivity of Photocatalytic Reactions.....	90
3.1.6.1	Polymorphs of the Photocatalyst.....	91
3.1.6.2	Crystallinity	91
3.1.6.3	Crystal Facets	91
3.1.6.4	Valence and Conduction Bands	92
3.1.6.5	Surface Acidity/Basicity.....	92
3.1.6.6	Surface Hydroxylation	93
3.1.6.7	Surface Modification.....	94

3.1.6.8	Mixed Photocatalysts	95
3.2	PHOTOCATALYTIC INORGANIC REACTIONS	95
3.2.1	Oxidative Reactions of Inorganics	95
3.2.1.1	Production of Bromine	96
3.2.1.2	Production of Hydrogen Peroxide	96
3.2.2	Reductive Reactions of Inorganics	97
3.2.2.1	Reduction of Nitrates	97
3.2.2.2	Reduction of Nitrite	97
3.2.2.3	Reduction of CO ₂	98
3.2.2.4	Reduction of Water (Photocatalytic Water Splitting)	100
3.3	PHOTOCATALYTIC ORGANIC REACTIONS	104
3.3.1	Selective Oxidations of Organics	104
3.3.1.1	Oxidation of Aliphatics	104
3.3.1.2	Oxidation of Aromatics	109
3.3.2	Selective Reduction of Organics	118
3.3.3	Cyclization Reactions	120
3.3.4	Polymerization Reactions	121
3.4	PHOTOCATALYTIC REACTORS AND ENGINEERING ASPECTS	122
3.4.1	Reactors Configuration	122
3.4.2	Photocatalytic Microreactors	125
3.4.3	Radiant Field and Kinetic Analysis	125
3.4.4	Photocatalytic Membrane Reactors	126
3.4.5	Case Studies	127
3.4.5.1	Reactors for CO ₂ Photocatalytic Reduction	127
3.4.5.2	Coupling Reaction and Separation Units for the Synthesis of Phenol	129
3.4.5.3	Coupling Reaction and Separation Units for the Synthesis of Aldehydes	131
