

COMPACT LIGHT-WEIGHT CO₂ CAPTURE TECHNOLOGIES FOR SMALL- TO MEDIUM-SCALE CO₂ EMITTERS

A techno-economic investigation
commissioned by the members of the
Carbon Dioxide Capture & Conversion (CO₂CC) Program

Client Private
September 2019

The Carbon Dioxide Capture & Conversion (CO₂CC) Program

The **CO₂CC Program** is a membership-directed consortium whose members are involved in the development, monitoring and utilization of the “state-of-the-art” in technological progress and commercial implementation of carbon dioxide capture/clean-up and conversion. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to document technically and commercially viable options for CO₂ capture/clean-up as well as its conversion into useful products which meaningfully address the challenges posed by CO₂ life-cycle and overall sustainability issues.

Members receive three in-depth **CO₂CC Techno-economic Reports** which are written by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CO₂CC Communiqués* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the CO₂CC Program **Annual Meeting**.

The **Carbon Dioxide Capture & Conversion (CO₂CC) Program** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact John J. Murphy at John.J.Murphy@catalystgrp.com or +1.215.628.4447 (x1121).

CONTENTS

EXECUTIVE SUMMARY	xxiii
1. INTRODUCTION	1
1.1 SCOPE AND OBJECTIVE OF THE REPORT	1
1.2 ORGANIZATION OF THE REPORT	1
1.3 SMALL TO MEDIUM EMITTERS OF CO ₂	2
1.4 PROGRESS TOWARDS DOWNSCALING	3
1.5 AUTHORS AND CONTRIBUTORS	3
2. PROFILE OF SMALL TO MEDIUM CO₂ EMITTING INSTALLATIONS	5
2.1 ENERGY	7
2.1.1 Sector Description	7
2.1.2 Flue Gas Sources	7
2.1.3 Status of Industry-specific CCS	7
2.2 COMBINED HEAT AND POWER	8
2.2.1 Sector Description	8
2.2.2 Flue Gas Sources	9
2.2.3 Status of Industry-specific CCS	10
2.3 IRON AND STEEL	11
2.3.1 Sector Description	11
2.3.2 Flue Gas Sources	11
2.3.3 Status of Industry-specific CCS	12
2.4 CEMENT	13
2.4.1 Sector Description	13
2.4.2 Flue Gas Sources	13
2.4.3 Status of Industry-specific CCS	14
2.5 PULP AND PAPER	15
2.5.1 Sector Description	15
2.5.2 Flue Gas Sources	15
2.5.3 Status of Industry-specific CCS	16
2.6 REFINERIES	16
2.6.1 Sector Description	16
2.6.2 Flue Gas Sources	16
2.6.3 Status of Industry-specific CCS	17
2.7 CHEMICAL INDUSTRY	18

2.7.1	Ethylene.....	18
2.7.2	Ethylene Oxide.....	19
2.7.3	Hydrogen.....	20
2.7.4	Ammonia.....	21
