

## CO<sub>2</sub> REDUCTION VIA BIOMASS CONVERSION IN ENERGY AND CHEMICALS

A techno-economic investigation  
commissioned by the members of the  
**Carbon Dioxide Capture & Conversion (CO<sub>2</sub>CC) Program**

Client Private  
October 2022

### **The Carbon Dioxide Capture & Conversion (CO<sub>2</sub>CC) Program**

The **CO<sub>2</sub>CC Program** is a membership-directed consortium whose members are involved in the development, monitoring and utilization of the “state-of-the-art” in technological progress and commercial implementation of carbon dioxide capture/clean-up and conversion. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to document technically and commercially viable options for CO<sub>2</sub> capture/clean-up as well as its conversion into useful products which meaningfully address the challenges posed by CO<sub>2</sub> life-cycle and overall sustainability issues.

Members receive three in-depth **CO<sub>2</sub>CC Techno-economic Reports** which are written by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CO<sub>2</sub>CC Communiqués* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the CO<sub>2</sub>CC Program **Annual Meeting**.

The **Carbon Dioxide Capture & Conversion (CO<sub>2</sub>CC) Program** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact Chris Dziedziak at [cdziedziak@catalystgrp.com](mailto:cdziedziak@catalystgrp.com) or +1.215.628.4447.

## CONTENTS

<b>EXECUTIVE SUMMARY .....</b>	<b>xxi</b>
<b>1. INTRODUCTION .....</b>	<b>1</b>
1.1 BIOMASS PROCESSING AND THE REDUCTION OF CO <sub>2</sub> EMISSIONS .....	1
1.2 SUSTAINABILITY METRICS .....	3
1.3 POLICIES ON BIOFUELS AND BIOCHEMICALS .....	4
1.4 SCOPE AND OBJECTIVES OF THE REPORT .....	5
1.5 ORGANIZATION OF THE REPORT .....	5
1.6 AUTHORS AND CONTRIBUTORS .....	6
1.7 REFERENCES .....	7
<b>2. BIOMASS CONVERSION IN ENERGY .....</b>	<b>9</b>
2.1. OVERVIEW OF ENERGY APPLICATIONS .....	9
2.1.1 Transport Fuels .....	9
2.1.2 Electricity and Heat .....	10
2.2 TRANSPORT FUELS .....	10
2.2.1 Drop-in Fuels – Diesel, Gasoline, and Jet Fuel Equivalents .....	10
2.2.2 Biodiesel .....	34
2.2.3 Ethanol .....	40
2.2.4 Renewable Natural Gas (RNG) .....	47
2.2.5 Hydrogen .....	54
2.3 ELECTRICITY AND HEAT .....	59
2.3.1 Solid Biomass .....	59
2.3.2 Biogas .....	64
2.4 SUMMARY AND OUTLOOK FOR ENERGY .....	66
2.5 REFERENCES .....	69
<b>3. BIOMASS CONVERSION IN CHEMICALS .....</b>	<b>81</b>
3.1 OVERVIEW OF BIOMASS FEEDSTOCKS AND BIOMASS VALUE CHAINS .....	81
3.1.1 Feedstock Pretreatment Technologies (Lignocellulose, Starch, Oil) .....	81
3.1.2 Feedstock Carbon Displacement Factors .....	85
3.1.3 Value Chains .....	88
3.2 BIOMASS INTERMEDIATE FEEDSTOCKS .....	90
3.2.1 Alkane Feedstocks .....	90

3.2.2	Naphtha Feedstocks .....	91
3.2.3	Emission Reduction .....	92
3.2.4	Summary and Outlook for Biomass Intermediate Feedstocks .....	92
3.3	SYNGAS VALUE CHAIN.....	93
3.3.1	Methanol.....	93
3.3.2	Formaldehyde .....	93
3.3.3	Acetic Acid .....	94
3.3.4	Emission Reduction .....	95
3.3.5	Summary and Outlook for Syngas Value Chain.....	96
3.4	C <sub>2</sub> VALUE CHAIN .....	97
3.4.1	Ethylene.....	97
3.4.2	Ethylene Oxide.....	100
3.4.3	Ethylene Glycol .....	100
3.4.4	Emission Reduction .....	101
3.4.5	Summary and Outlook for C <sub>2</sub> Value Chain.....	102
3.5	C <sub>3</sub> VALUE CHAIN .....	103
3.5.1	Propylene.....	103
3.5.2	Propylene Oxide.....	103
3.5.3	Propylene Glycol.....	103
3.5.4	Isopropanol .....	104
3.5.5	Acrylonitrile.....	104
3.5.6	Acrolein .....	106
3.5.7	Acrylic Acid.....	106
3.5.8	Lactic Acid .....	107
3.5.9	Emission Reduction .....	109
3.5.10	Summary and Outlook for C <sub>3</sub> Value Chain .....	111
3.6	C <sub>4</sub> VALUE CHAIN .....	111
3.6.1	Iso-butylene .....	111
3.6.2	1,3- Butadiene .....	111
3.6.3	Emission Reduction .....	113
3.6.4	Summary and Outlook for C <sub>4</sub> Value Chain.....	113
3.7	C <sub>5</sub> VALUE CHAIN .....	114

3.7.1	Levulinic Acid .....	114
3.7.2	Furfural.....	115
3.7.3	Emission Reduction .....	117
3.7.4	Summary and Outlook for C <sub>5</sub> Value Chain.....	117
3.8	C <sub>6</sub> /C <sub>6+</sub> VALUE CHAIN.....	118
3.8.1	BTX: Benzene, Toluene, Xylene .....	118
3.8.2	Phenols .....	119
3.8.3	2,5-Furan Dicarboxylic Acid (FDCA)/ 5-Hydroxymethylfurfural (HMF).....	120
3.8.4	Emission Reduction .....	121
3.8.5	Summary and Outlook for C <sub>6</sub> /C <sub>6+</sub> Value Chain.....	122
3.9	BIOSURFACTANTS .....	123
3.9.1	Emission Reduction .....	126
3.9.2	Summary and Outlook for Biosurfactants.....	128
3.10	SUMMARY AND OUTLOOK FOR BIOCHEMICALS .....	129
3.11	REFERENCES .....	130
<b>4.</b>	<b>INDEX.....</b>	<b>143</b>
