

## ADVANCES IN MATERIALS FOR CATALYSIS

A technical investigation  
commissioned by the members of the  
Catalytic Advances Program

Client Private  
September 2023

## The Catalytic Advances Program (CAP)

**The Catalytic Advances Program (CAP)** is an information resource for research and development organizations in the petroleum, chemical, and polymer industries. By the direction of the member companies (through balloting and other interactive means), the program delivers a range of timely and insightful information and analyses which are accessible exclusively to members and protected by confidentiality agreements. The objective is to provide a technical update on commercially viable advances in catalysis as well as benchmark commercial advances in catalysis and process technology.

Members receive three in-depth **CAP Technical Reports** which are written and peer reviewed by leading scientists and experienced industry professionals in areas selected by the membership (via ballot); weekly *CAP Communications* (delivered via e-mail) which provide the latest updates on technical breakthroughs, commercial events and exclusive development opportunities; and attendance at the **CAP Annual Meeting**.

The **Catalytic Advances Program (CAP)** is available on a membership basis from The Catalyst Group Resources (TCGR). For further details, please contact Chris Dziedziak at [cdziedziak@catalystgrp.com](mailto:cdziedziak@catalystgrp.com) or +1.215.628.4447.

## CONTENTS

<b>EXECUTIVE SUMMARY .....</b>	<b>xxiii</b>
<b>1. INTRODUCTION .....</b>	<b>1</b>
<b>2. SINGLE ATOM CATALYSTS.....</b>	<b>3</b>
2.1 INTRODUCTION.....	3
2.2 SYNTHETIC METHODS.....	6
2.2.1 Co-precipitation .....	6
2.2.2 Impregnation.....	6
2.2.3 Ball Milling .....	7
2.2.4 Atomic Layer Deposition .....	9
2.2.5 Chemical Etching .....	9
2.2.6 Deposition-precipitation .....	10
2.2.7 Surface Organometallic Chemistry and Coordination Site Strategies .....	10
2.2.8 Pyrolysis .....	11
2.2.9 Freeze Drying .....	12
2.2.10 Photochemical Methods .....	12
2.2.11 Mass-selected Soft-landing .....	12
2.3 CHARACTERIZATION TECHNIQUES.....	12
2.3.1 High Resolution Electron Microscopies.....	13
2.3.2 X-ray-based Techniques .....	13
2.3.3 In Situ Spectroscopies .....	14
2.4 FEATURES OF THE CLASSES OF ELEMENTS USED IN SACS .....	17
2.4.1 Alkaline Metals .....	17
2.4.2 Alkaline Earth Metals .....	18
2.4.3 Early Transition Metals .....	19
2.4.4 Late Transition Metals.....	21
2.4.5 Lanthanides and Actinides .....	44
2.4.6 Post Transition Metals .....	45
2.4.7 Metalloids .....	47
2.4.8 Non-metals .....	48
2.5 REFERENCES.....	51

<b>3. RECENT LITERATURE ON THE MAIN REACTIONS CATALYSED BY SACS.....</b>	<b>107</b>
3.1 OXIDATIONS.....	107
3.2 C-C, C-N, AND C-O COUPLINGS.....	108
3.3 CYCLOADDITIONS AND CLICK METHODS .....	109
3.4 HYDROELEMENTATIONS.....	110
3.5 HYDROGENATION AND REDUCTIONS .....	111
3.6 HYDROFORMYLATION .....	112
3.7 CARBOXYLATIONS AND FLUORINATION .....	113
3.8 SELECTIVE REFORMING .....	113
3.9 CONCLUSIONS, CHALLENGES AND PERSPECTIVES .....	114
3.10 REFERENCES .....	116
<b>4. 2D MATERIALS.....</b>	<b>121</b>
4.1 INTRODUCTION .....	121
4.2 SINGLE ELEMENT 2D MATERIALS.....	122
4.2.1 Graphene.....	122
4.2.2 Graphyne.....	125
4.2.3 Black Phosphorus .....	125
4.2.4 2D Metal Alloys .....	126
4.3 TWO ELEMENT 2D MATERIALS.....	127
4.3.1 Carbon Nitride .....	127
4.3.2 Boron Nitride.....	127
4.3.3 Transition Metal Dichalcogenides .....	128
4.4 MULTI-ELEMENT 2D MATERIALS.....	129
4.4.1 2D Organic Materials .....	129
4.4.2 MXenes.....	129
4.5 REFERENCES .....	135
<b>5. 3D MATERIALS.....</b>	<b>151</b>
5.1 METAL-ORGANIC FRAMEWORKS .....	151
5.1.1 Introduction.....	151
5.1.2 Preparation Methods.....	153
5.1.3 Influence of the Synthetic Conditions on MOF Structures .....	157
5.1.4 Catalytic Applications .....	158

5.1.5	Comparisons and Perspectives .....	167
5.2	COVALENT-ORGANIC FRAMEWORKS.....	168
5.2.1	Introduction .....	168
5.2.2	Linkage Types .....	169
5.2.3	Preparation Methods.....	171
5.2.4	Structure Analysis .....	173
5.2.5	Catalytic Applications .....	174
5.2.6	Comparisons and Perspectives .....	176
5.3	ZEOLITIC IMIDAZOLATE FRAMEWORKS .....	177
5.3.1	Introduction .....	177
5.3.2	Preparation Methods.....	178
5.3.3	Thermal and Chemical Properties of ZIFs .....	180
5.3.4	Catalytic Applications .....	181
5.3.5	Comparisons and Perspectives .....	185
5.4	REFERENCES.....	186
<b>6</b>	<b>ADVANCES IN CATALYTIC PROPERTIES OF TRADITIONAL MATERIALS .....</b>	<b>205</b>
6.1	METAL OXIDES.....	205
6.2	ZEOLITES .....	206
6.3	TITANIUM SILICALITE.....	208
6.4	METAL NANOPARTICLES .....	209
6.5	CARBON BASED MATERIALS .....	211
6.6	REFERENCES.....	211

## FIGURES

Figure 2.1	Single-atom catalysts (SACs) incorporate many advantageous features of homogeneous and heterogeneous catalysts .....	4
Figure 2.2	Geographical distribution and number of research articles and patents on SACs from 2011 to 2020 per country.....	5
Figure 2.3	Support modification and Pt deposition .....	7
Figure 2.4	Theoretical analysis of the FeN <sub>4</sub> /GN structure and the catalytic reaction process by DFT calculations .....	8
Figure 2.5	Schematic representation of the main host engineering strategies (left) and main anchoring sites in some carbon based materials (right).....	16

Figure 2.6	Schematic illustration of single-atom Pd1/graphene catalyst synthesis via a process of anchor sites creation and selection and Pd ALD on pristine graphene .....	35
Figure 2.7	Timeline showing the important developments of carbon-based metal-free catalysts .....	40
Figure 3.1	Catalyst preparation process. Schematic illustration of the synthesis of Fe <sub>1</sub> -N-C catalyst.....	107
Figure 3.2	Synthetic strategy of the Cu <sub>1</sub> -O(I)/CeO <sub>2</sub> catalyst.....	111
Figure 4.1	Ambipolar electric field effect in single layer graphene .....	123
Figure 4.2	Synthesis and characterization of MXenes.....	130
Figure 4.3	Effect of synthesis conditions of MXenes.....	131
Figure 5.1	Formation of MOF structure by formation of chemical bonds between the metal ions as nodes and the organic molecule as a linker .....	151
Figure 5.2	Condensations of widely used types of linkages in COFs.....	169
Figure 5.3	Schematic representation of the properties and advantages of various synthetic routes toward COFs.....	171
Figure 6.1	Schematic representation of main metal-support interactions and their tuning strategies .....	210

## TABLES

Table 5.1	Most Common Used MOF Terms .....	152
Table 6.1	Industrial Catalysts Prepared by Precipitation, Coprecipitation Techniques .....	205
Table 6.2	Industrial Catalysts Prepared by Sol-gel or Hydrothermal (Templated) Techniques .....	206
